

The  
International  
Mitochondrial Medicine Association

**IMMA – Prize 2000**

*for*

extraordinary clinically relevant scientific efforts in the area of  
Mitochondrial Medicine

*to*

**Dr. med. Michael Kucera**

Dr. Kucera as an internationally active medical doctor has very often experienced the limits of the conventional medicine. Very early he recognized the enormous potential of the Mitochondrial Medicine and introduced the new concept as a basic therapeutic tool. By Heart Frequency Variability measurement he was able to monitor the efficacy of the actual therapy. In hopeless cases he was able to help patients applying the Mitochondrial Medicine and especially Q10 / Guttaquinone® in a nanoparticle formulation.

Bad Homburg, the 15<sup>th</sup> of November 2000

Dr. Franz Enzmann  
President

The IMMA-Prize amounting to DM 10.000,00 is annually awarded by  
MSE Pharmazeutika GmbH.
